## 1.1 Introduction

Movie Shop is an app that can be used for managing a movie library in a DVD rental store.

Functionality is divided into 3 main categories for the Administrator:

1. Adding movies to the library
2. Browsing the titles available in the library
3. Configuring settings

The app also allows potential customers to login and browse the available titles. Then they can either purchase them outright, or apply for a 6-month or annual subscription which allows them to freely rent a certain number of DVD's within that time-frame.

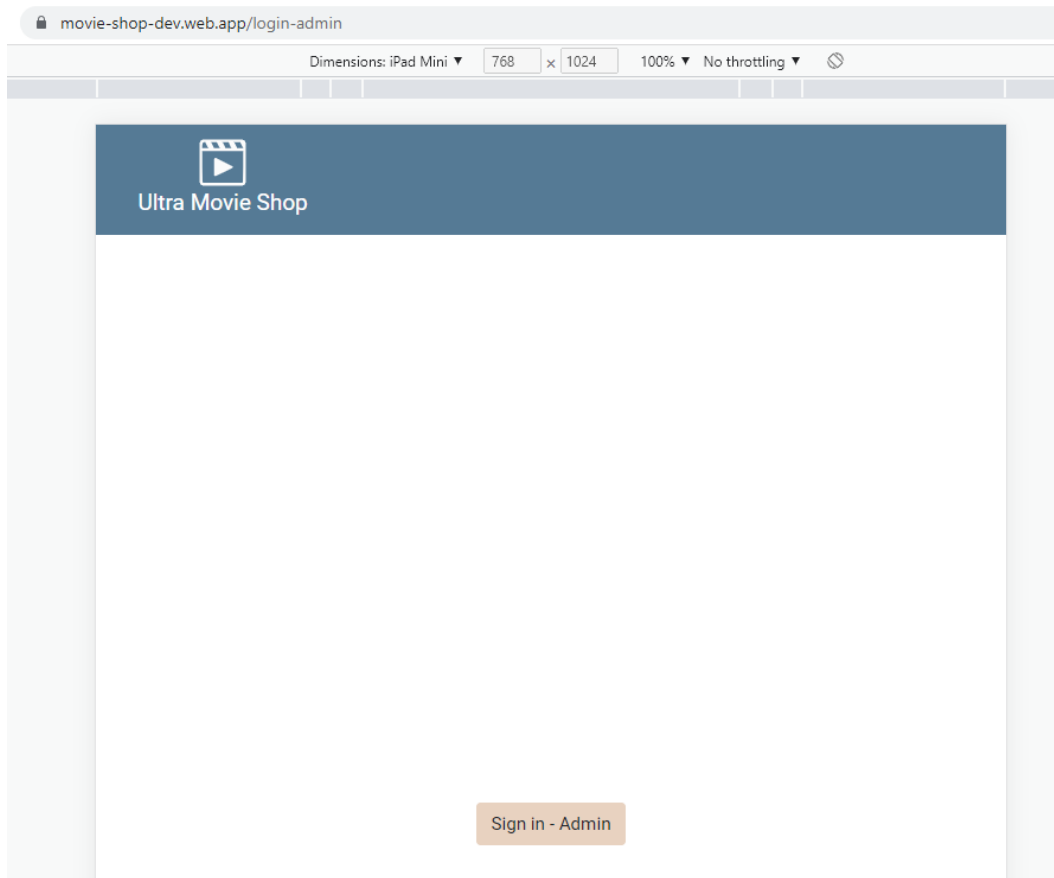

This app is meant to showcase my skills in NextJS and GraphQL, and is hosted at:

<https://movie-shop-dev.web.app>

Following are the user flows:

## 1.2 Logging in as admin

In order to login as admin, you need to manually visit the page <hosted URL>/login-admin. This is hidden from the welcome screen, as the latter is accessible to customers.

Clicking on Sign in-Admin will take you to the login screen. You may enter the username and password provided by the app vendor:

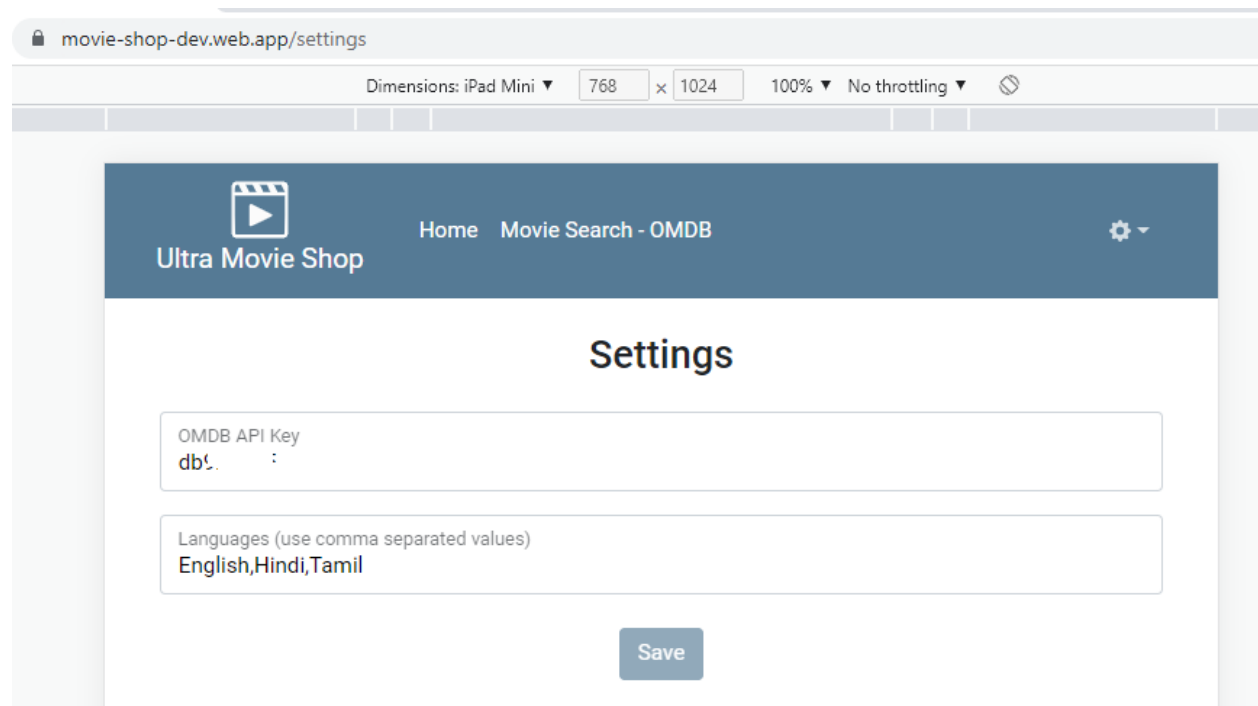

A screenshot of a login screen for 'Movie Shop'. At the top is a logo consisting of a red star inside a shield shape, with the text 'Movie Shop' below it. Below the logo are two input fields. The first field has an email icon and contains the text 'admin@movie-shop.com'. The second field has a lock icon and contains a series of dots representing a password. Below the password field is a link that says 'Don't remember your password?'. At the bottom of the screen is a large green button with the text 'LOG IN >'.

## 1.3 Setting up

Once logged in, the admin needs to setup some mandatory information in order to use the app functionality under the 'Settings' tab.

1. An OMDB API key needs to be obtained. This can be done via <http://www.omdbapi.com/apikey.aspx>. For free or at a price. This key must be inserted into the 'OMDB API key' field.
2. Languages of titles that customers will wish to browse must be added as a comma-separated string under 'Languages' field.

See the figure below to notice some filled-in fields.

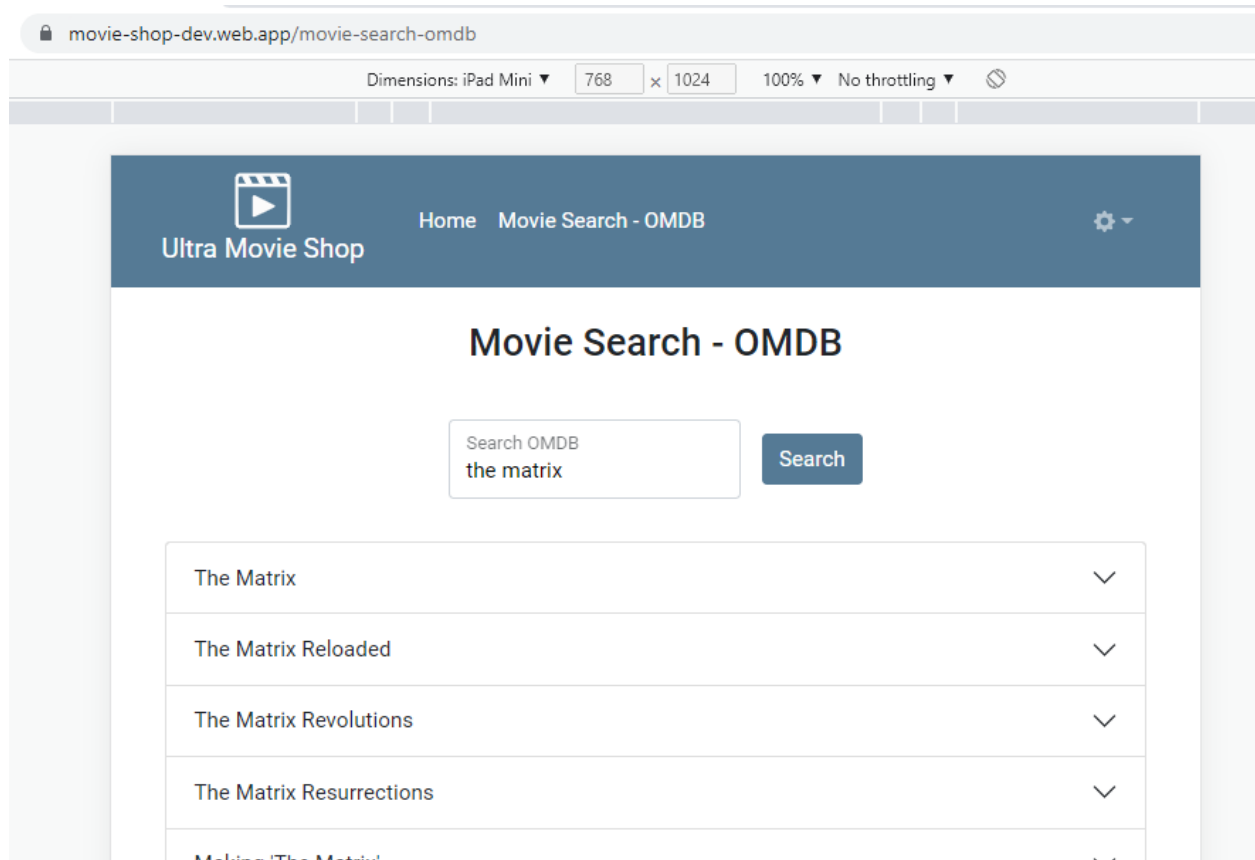

## 1.4 Adding movies to the library

Instead of having to manually add all movie-related information into the app, the app allows the admin to search the OMDB database for a movie. Once the movie is found, then the admin can add that title to the library. Then all the movie related metadata is automatically added. The 'Movie Search – OMDB' tab can be used for this.

E.g.: to add 'The Matrix' movie, follow the steps below:

Type 'the matrix' in the search box and press 'Search'. Then all the matching results from OMDB are displayed:

Click on 'The Matrix', since it is the movie we wish to add. An accordion opens, providing some more details of the movie:

The Matrix

1999 mov

Keanu Reeves, Laurence Fishburne, Carrie-Anne Moss

Thomas A. Anderson is a man living two lives. By day he is an average computer programmer and by night a hacker known as Neo. Neo has always questioned his reality, but the truth is far beyond his imagination. Neo finds himself targeted by the police when he is contacted by Morpheus, a legendary computer hacker branded a terrorist by the government. As a rebel against the machines, Neo must confront the agents: super-powerful computer programs devoted to stopping Neo and the entire human rebellion.

Now click '+1 to Library' and 'Save'. Then the movie and its related metadata gets added to the library.

## 1.5 Browsing the titles available in the library

Now we can proceed to the 'My Library' tab and view the movie we just added.

Enter 'the matrix' in the Title search box, and press 'Search'. Now you will see the movie displayed in the table below:

The screenshot shows a web browser window with the address bar displaying 'movie-shop-dev.web.app'. The browser's developer tools are open, showing the dimensions as 768x1024 at 100% zoom. The application interface has a dark blue header with a play button icon, the text 'Ultra Movie Shop', and navigation links for 'Home' and 'Movie Search - OMDb'. A settings gear icon is in the top right. The main content area is titled 'Search Library' with a dropdown arrow. It contains five search filters: 'Title' (text input with 'the matrix'), 'Type' (dropdown menu with 'Movie'), 'Language' (dropdown menu with 'All'), 'Year' (text input with a blue question mark icon), and 'Genres' (text input with a blue plus icon). Below these filters are three buttons: 'Search' (dark blue), 'Reset' (light orange), and 'Export to CSV' (light orange). A search result is displayed in a white box with a dropdown arrow, showing 'The Matrix'. At the bottom right, it says '1 results found' and includes a pagination control with arrows and the number '1' highlighted.

You can now click on the movie title to view more details in the sidebar, just as in Section 1.4.

In order to search for titles, you need to enter either the Title, Type (Movie/TV Series), Language, year or genre(s). A year to search for can be entered in one of the following formats:

To enter a single year: 2020

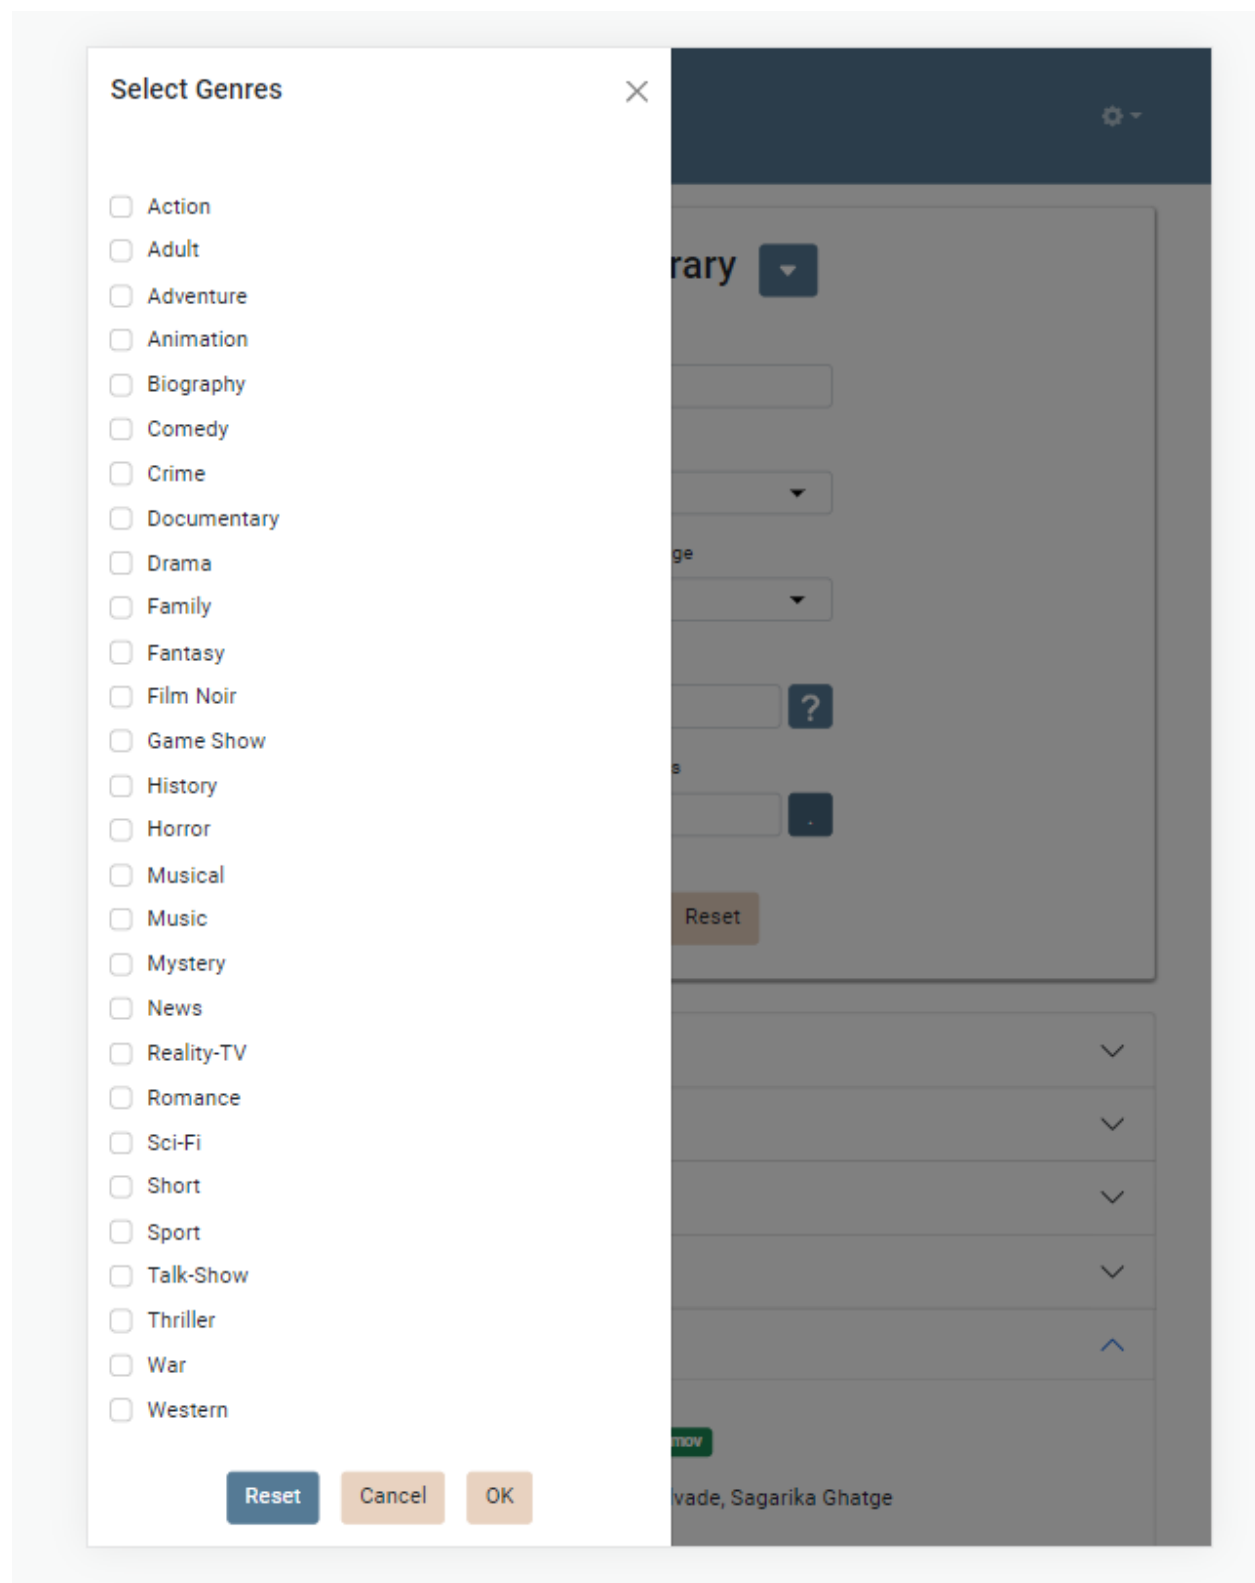

To enter a year to search from: > 2020

To enter a year to search upto: < 2020

To enter a range of years: 2010-2020

Note: searching by year is only enabled for Movie Type.

Search by Genre is shown below:

The titles that we searched can be exported to a CSV file by pressing 'Export to CSV'.

## 1.6 Editing and removing the titles available in the library

Existing titles in the library can be edited in the following 2 ways in the movie details sidebar:

- Languages can be added or removed
- Quantity of the title can be increased or decreased.

The title can also be completely removed from the library using 'Delete from library' button.

The Matrix

1999 mov

Keanu Reeves, Laurence Fishburne, Carrie-Anne Moss

Thomas A. Anderson is a man living two lives. By day he is an average computer programmer and by night a hacker known as Neo. Neo has always questioned his reality, but the truth is far beyond his imagination. Neo finds himself targeted by the police when he is contacted by Morpheus, a legendary computer hacker branded a terrorist by the government. As a rebel against the machines, Neo must confront the agents: super-powerful computer programs devoted to stopping Neo and the entire human rebellion.

## 1.7 Login for customer

When visiting the hosted URL for the app, the potential customers can login and browse the available titles. Here is the welcome screen viewed by the customers:

Currently, customers need to sign in with their Google account:

Signing in is mandatory to avoid unwanted resource usage by hackers or bots.

Once logged in, only the 'My Library' tab contents are visible to the customer, similar to section 1.5. However, they are barred from performing any admin actions.

## 1.8 Renting a DVD

Once a user finds a title they like, they can do a one-off rent by adding to the Cart, and then proceeding to checkout:

April 1917, the Western Front. Two British soldiers are sent to deliver an urgent message to an isolated regiment. If the message is not received in time the regiment will walk into a trap and be massacred. To get to the regiment they will need to cross through enemy territory. Time is of the essence and the journey will be fraught with danger.

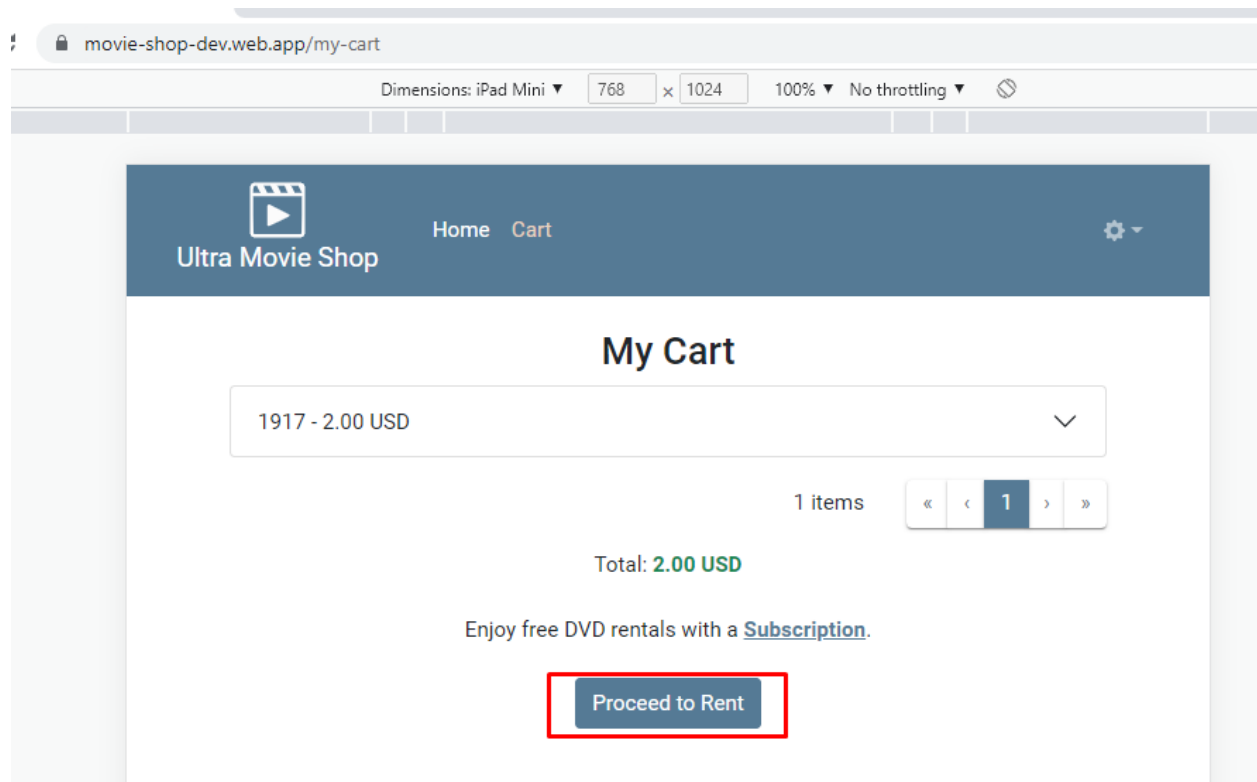

Movie Languages:

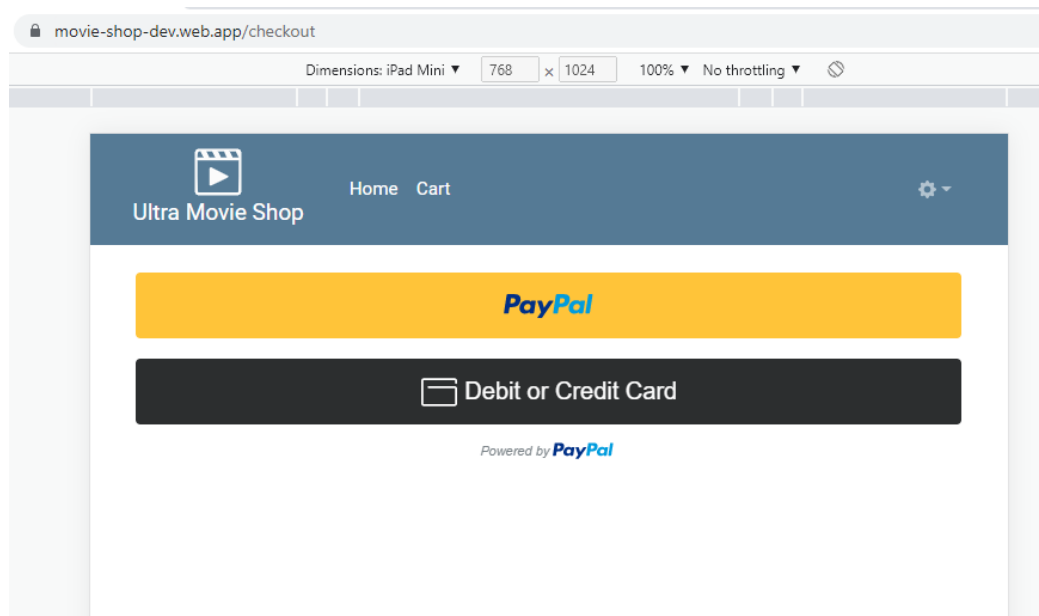

☒ English ☐ Hindi ☐ Tamil

[View in IMDB](#)

[Add to Cart](#)

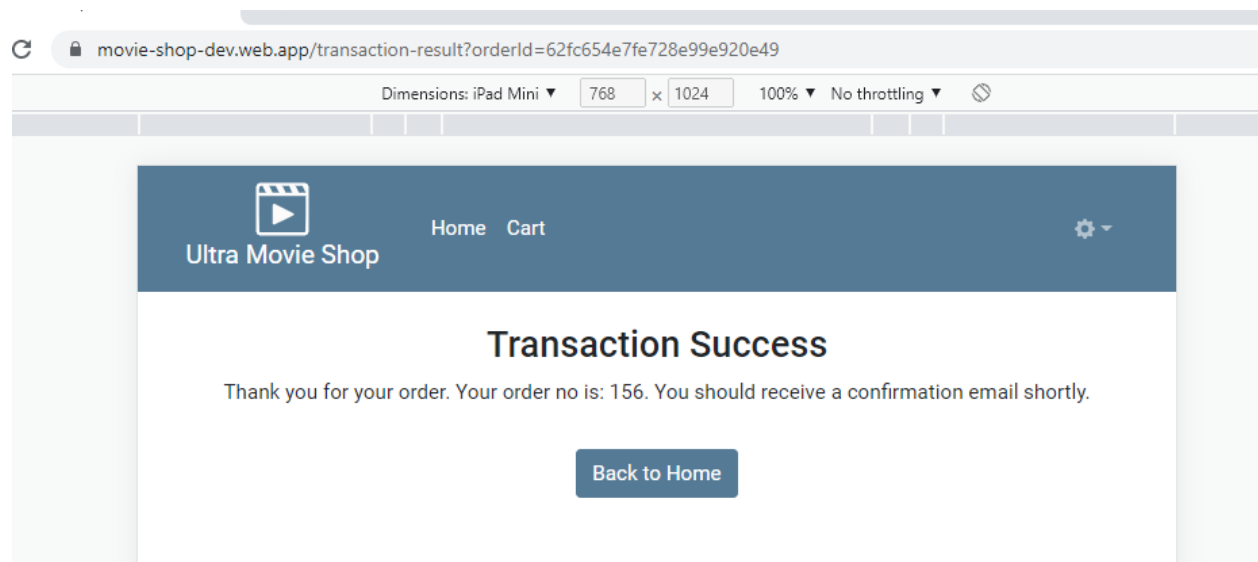

Then the relevant payment provider's (Paypal/Stripe) checkout page will appear, depending on which payment provider is chosen in the build settings. E.g.:

The screenshot shows the payment interface of the 'Ultra Movie Shop'. At the top is a dark blue header with a play button icon, the text 'Ultra Movie Shop', and links for 'Home' and 'Cart'. A settings gear icon is on the right. The main content area is a light gray box containing the payment form. The form has three sections: 'Card number' with a text input containing '1234 1234 1234 1234' and logos for VISA, Mastercard, AMEX, and eelo; 'Expiration' and 'CVC' with text inputs 'MM / YY' and 'CVC' respectively, and a small card icon; and 'Country' with a dropdown menu showing 'Sri Lanka'. Below these is a disclaimer: 'By providing your card information, you allow Ultra Movie Store to charge your card for future payments in accordance with their terms.' At the bottom is a large blue button labeled 'Pay now'.

Once the payment is done, then you will be taken to the Transaction Confirmation screen, which shows the order number:

A confirmation email is also sent to the user, with the titles that were checked out:

Ultra Movie Shop - Order #156 placed successfully  

**Ultra Movie Shop** <dev\_monty\_rom@yahoo.com>

to me ▼

Dear Customer,

Thank you for your order for renting the following DVD's. They will be reserved and available at our store for pickup over the next 2 weeks.

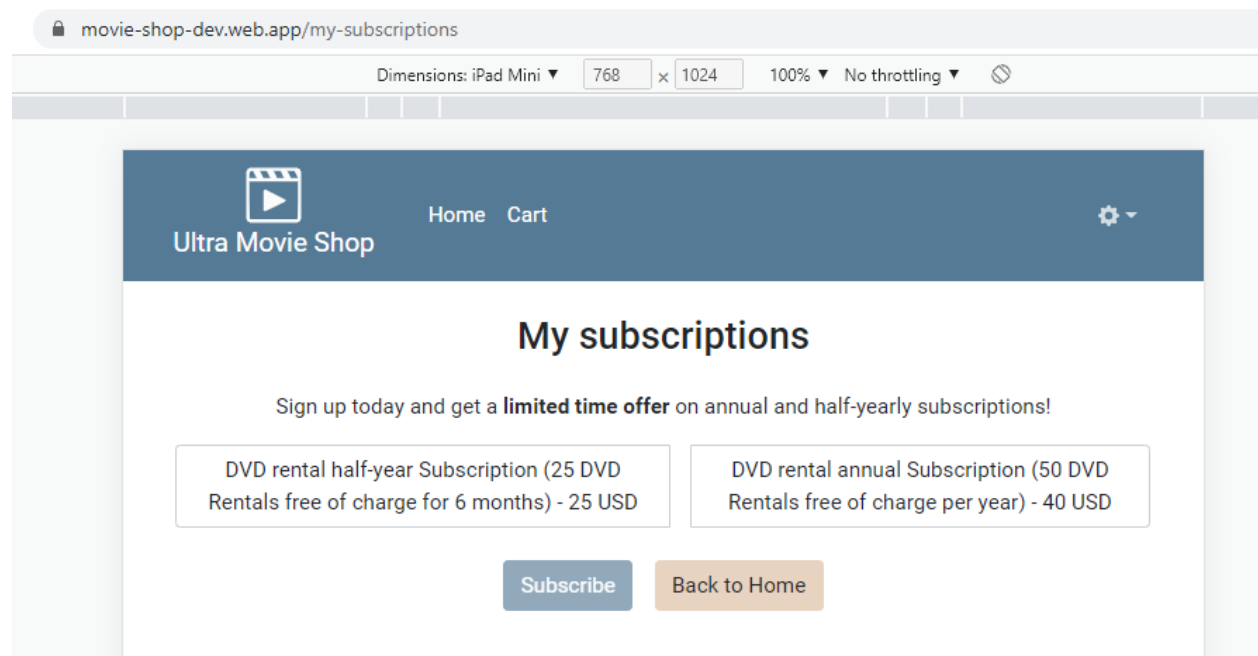

- 1917

Please feel free to contact our helpdesk on 222-333-444 for any queries.

Thank you,  
Team Ultra.

## 1.9 Applying for a subscription

The user can also apply for a 6-month or annual subscription which allows them to freely rent a certain number of DVD's within that time-frame. Here is the My Subscriptions page:

Clicking on 'Subscribe' button will take the user to a payment page, just like in Section 1.8 above. Thereafter, the user can freely rent DVD's for the chosen time-period. Paypal and Stripe Subscriptions are used under the hood for this purpose.

## 1.10 Movie search Analysis

This is an analytic feature of the app, accessible to the Admin via the menu option 'Movie Search Analysis':

There are 2 types of graphs visible in this page:

1. Library Movie Analysis

### Library Movie Analysis

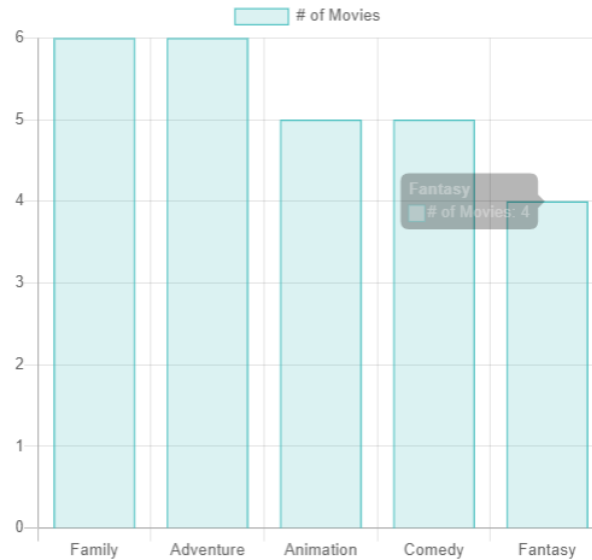

Below chart displays top 5 genres of all titles in the library.

2. Search Movie Analysis

## Search Movie Analysis

Below chart displays top 5 genres of all titles that users viewed details of, the past month.

These 2 graphs are meant to help the rental shop owner view which genres of movies the customers are searching, and decide how to expand the collection of titles accordingly to match customer demand.

### 1.11 Responsive design

The screens are mobile friendly.

### 1.12 Dark mode support

The 'prefers-color-scheme' CSS media query is used for dark mode support. E.g.:
